

# CIRCUIT BENDING

## WORKSHOP/PARTY

*Have fun by breaking your toys!*

**CIRCUIT BENDING** is the creative short-circuiting of low-voltage, battery-powered electronic audio devices such as children's toys and small synthesizers to create new musical instruments and sound generators. Emphasizing spontaneity and randomness, many more conventional contemporary musicians and musical groups have been known to experiment with "bent" instruments.

Musical accompaniment by  
**Discoma** and **Bonefish Sam & His Orchestra**,  
perhaps on bent instruments.

# NOVEMBER 10, 2007

## 6:00 P.M. at the Holoport

5232 Fairview Avenue, Boise

Admission: \$4.00 at the door • Food available from "El Pueblo"

All experience levels and all ages welcome. Bring a toy or two to hack, and feel free to bring your own electronics tools, if you have them.

Limited tools and some toys will be provided.

BoCon is a monthly series of exhibits, shows and speaking events designed to promote awareness of Open-Source culture, and challenge the public's view of music, art and software.
